XX ART FLÂNERIE

XX ART FLÂNERIE is an 8-day international, decentralized and transdisciplinary art and culture festival in Vienna that promotes projects that focus on contemporary resonance of historical and demographic contexts as well as the examination of current social developments.

XX ART FLÂNERIE will take place from July 1 to 9, 2022 in various locations in the 15th district, such as Aa Collections, Improper Walls, Hollerei Gallery, Artivive, Studio Bitterer Ernst, Brick 15, Wild im West. Projects in public, performances, panel discussions, exhibitions, and artist studios are freely accessible.

The cooperation of the regions and countries, Lithuania, Catalonia and Vienna, enables the setting of a local as well as global focus.

In addition to the program in the main locations, there will be various concerts at Brick 15 and at a secret location (announcement after registration). As main act EXPAT (Mykki Blanco & Samuel Acevedo) will perform live.

Tickets for the concerts can be purchased on the [website](#).

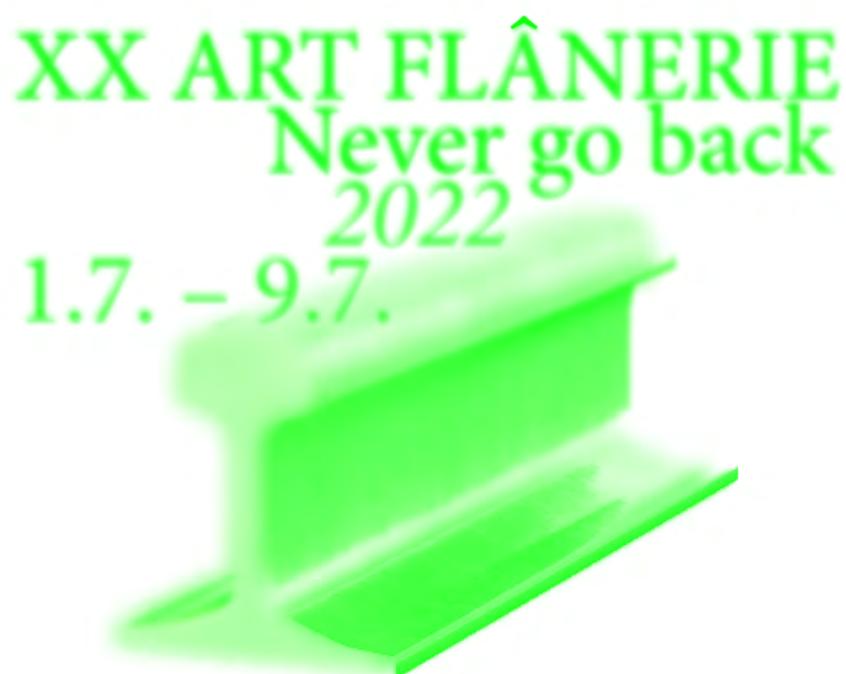

Also special to the festival will be a performance by God's Entertainment, an experimental theater-performance collective, which will take place in a tram. The modality -pay as you play- applies here.

THEME 2022 – NEVER GO BACK

This year's theme is „Never go back“ and deals with migration and the importance of public transport and trains. A train that keeps returning from terminus to terminus, at the same moment for some passengers with one-way ticket, has a different weight and can represent the way to a new life.

The theme, as every year, is multi-layered, it also refers to the tragic event of this year, to the Russian Invasion and following war in Ukraine and the social and political issues related to it, and shows parallels with past conflicts in Europe, to which we never wanted to return. Also the literal burning question of energy supply and its alternatives, are included in the title, which demands from our generation: to look forward.

In doing so, we see ourselves committed to the task of art, in addition to the depiction of the beautiful, to pose unpleasant questions and, in the tradition of the Enlightenment, to enable a discourse on difficult topics to a broader audience.
